SUMMARY

Full-stack Software Engineer specializing in backend-heavy web applications, scalable REST APIs, and cloud-based systems. Experienced in building secure user workflows, database-backed services, AWS S3 storage integrations, and production-ready applications with strong focus on reliability, performance, and maintainability.

TECHNICAL SKILLS

Languages:	JavaScript (ES6), TypeScript, Python, Java
Frontend:	React.js, Next.js, Redux Toolkit, Tailwind CSS, Vite, Recharts
Backend:	Node.js, Express.js, Django REST Framework, FastAPI, REST APIs, JWT
Database:	PostgreSQL, MySQL, MongoDB, Redis, Prisma, ClickHouse
Cloud & DevOps:	AWS, Docker, Kubernetes, Nginx, Gunicorn, GitHub Actions, CI/CD
Testing & Tools:	Jest, Pytest, Vitest, Zod, Postman, Swagger/OpenAPI, Gemini API

EXPERIENCE

Full Stack Developer, Saayam For All | San Jose, CA **Jan 2026 – Present**

- Secured profile photos with Java REST APIs, AWS S3, and DB path mapping, eliminating public S3 exposure.
- Fixed profile image access issues by implementing CORS-safe Java REST upload/retrieval flows with AWS S3 storage.
- Reduced onboarding errors with a JWT-mapped Java organization API, validation, and database persistence.
- Improved onboarding visibility by exposing wizard status APIs through AWS API Gateway and Java REST services.

Software Engineer, Mepro Tech | Mumbai, MH **Apr 2022 – May 2023**

- Improved scalability by 30% by helping split a Django monolith into 4 Python microservices on AWS EC2.
- Supported 5,000+ users with sub-500ms DRF APIs using Redis caching, Gunicorn, and Nginx.
- Cut database latency by 80% by optimizing 15+ MySQL queries with indexing and connection pooling.
- Maintained 99.9% uptime with AWS EC2, RDS, Load Balancer, CloudWatch, Nginx, and Gunicorn.

PROJECTS

PulseOps | TypeScript, Cloudflare Workers, Cloudflare D1, Cloudflare Pages, Cron Triggers **GitHub**

- Improved uptime visibility by building serverless API monitoring with Cloudflare Workers, D1, and Cron Triggers.
- Automated incident detection with failure thresholds and recovery workflows, reducing manual status tracking.
- Built public status pages with React, TypeScript, and Tailwind CSS for latency charts and check history.
- Improved deployment reliability with GitHub Actions CI/CD on Cloudflare Pages and Workers.

CivicPulse | Next.js, Supabase, PostgreSQL, RLS, Leaflet, OpenStreetMap, Recharts, Vercel **GitHub**

- Improved civic reporting by building image-based submissions, status tracking, and role access with Next.js and Supabase.
- Strengthened access control by securing user/admin workflows with Supabase Auth, PostgreSQL, Storage, and RLS.
- Increased public visibility by adding filtered issue maps and live updates with Leaflet and Supabase Realtime.
- Reduced manual ops by adding moderation, analytics, alerts, validation, and CI with Recharts, Zod, and Vitest.

SignalForge | SvelteKit, TypeScript, FastAPI, Python, ClickHouse, Gemini API, Pytest **GitHub**

- Reduced log noise by grouping related failures into incidents using FastAPI, Python workers, and PostgreSQL.
- Improved outage detection by adding error-spike and latency anomaly detection with rollups, z-scores, and ClickHouse.
- Increased debugging speed by generating AI incident summaries with Gemini, timelines, causes, and action steps.
- Improved pipeline reliability with async ingestion, API-key auth, Redis queues, retries, rate limits, and Discord alerts.

FormFlow | React, NestJS, Node.js, PostgreSQL, Prisma, Redis, Docker, Kubernetes, Jest **GitHub**

- Reduced form creation friction by building a JWT-secured form builder with React, NestJS, and PostgreSQL.
- Improved response management with Prisma-backed CRUD, publishing, analytics, and searchable submissions.
- Added reliable async delivery with webhook tracking, retry workflows, and internal job endpoints.
- Improved deployment portability with Docker, Kubernetes manifests, secrets, CI tests, builds, and audits.

EDUCATION

Oregon State University | Corvallis, OR **Sep 2023 – Dec 2025**

Master of Engineering, Computer Science

Thakur College of Science and Commerce | Mumbai, India **Jun 2019 – Mar 2022**

Bachelor of Science, Computer Science
